

## **“The Big Book of SONAR Tips” Contents**

Author’s Preface

### **Chapter 1: SONAR Workflow**

Inspector / Console View Synergy  
Gridlock: Everything You Wanted to Know About Snap  
Everything You Wanted to Know about Audio Scaling  
See Lots of Sends at Once  
Add Pro Tools-Style Dual Panpots to SONAR  
A “Peak Hold” Trick for Mastering (or Making Files Sound “Louder”)  
Fun with the Magnifying Glass Zoom  
Synth Folder Track Coolness  
“Dual Defaults” for Control Settings  
Take Advantage of Different Browser Views  
Adjust Crossfade Start and End Times Simultaneously and Symmetrically  
Dim Solo Meets Comping  
EZ Arranging in SONAR  
The SONAR “Sandbox”  
Soft Synths—Beyond MIDI Learn  
Stupidly Simple Track Pane Resizing  
Order out of Chaos with SONAR’s Plug-In Manager  
Neaten Clips Spread over Multiple Take Lanes  
MIDI in Audio Take Lanes? Yes! Here’s Why  
The Virtual “Back of the Tape Box”  
The Third Way to Back Up Projects  
A Whole Bunch of Really Useful Utilities  
Track Sorting  
Preset Management and the Plug-In Header  
Reclaim Session Drummer 2 Programs for SD3  
Future-Proof Backup  
Fast and Easy Real-Time Effects Control  
Get MONDO HUGE Layered Sounds with Take Lanes  
Cross-Track Modulation with Sidechaining  
Independent Left/Right Processing for Stereo Files  
The Overachieving Meters  
Deciphering New Project Options

### **Chapter 2: Patch Points and Synth Recording**

Universal Routing Technology 101: Improve Your Workflow with Patch Points  
Unlocking the Aux Track’s Creative Potential

Synth Recording to the Rescue  
A Video Application for Synth Recording

### **Chapter 3: Signal Processing**

The High-Performance Graphic Equalizer  
The Customizable Virtual Pop Filter that Really Works  
SONAR's Secret Auto-Panner/Tremolo/Vibrato Plug-In  
A Better Gated Reverb  
Duck! (As in, Reverb)  
Beef Up Your Beats with ProChannel Signal Processing  
The Miracle of Mid-Side EQ: Rock Your Mixes and Masters  
Why the TS-64 Transient Shaper Is a Bass's BFF  
The Big, Bad Drum Reverb Sound  
Ethereal Pads and Choirs with TH3 Cakewalk's Parallel Processing  
Godzilla Drum Sounds  
"Parallel" Mastering  
The ProChannel "Distortion Construction Kit"  
Preserving Dynamics with Saturation  
Multiband Maximization for Mastering  
The "Sizzle" Bus  
Fixing the "Remove Silence" Function  
Better Vocals with Gain Changes  
Synthesize Your Own Convolution Reverb Impulses - Easily!  
Understanding the QuadCurve—Why Noise Is Your Friend  
The "Tape Stop" Effect  
SONAR Professional/Platinum's Secret MultiFX  
Modeling a Vintage Wah  
Understanding the "Rule of Half"

### **Chapter 4: FX Chains**

Create the "Harmonic Phaser"  
The Super-Gentle "Lifter" Dynamics Processor  
Build a "Virtual Stompbox" Sustainer  
The Instant Compressor  
Serial Reverb for Vocals

### **Chapter 5: Melodyne**

Create Vocal Harmonies with Melodyne Essential  
Easy Automatic Double Tracking (ADT) with Melodyne Essential  
Create Chord Progressions with Melodyne Essential  
The Secret Melodyne Essential LFO Vibrato Tool

Tweaking Vibrato with Melodyne Essential  
The Melodyne Essential Envelope-Following Flanger  
Make Your Electric Bass Hugely Big

## **Chapter 6: MIDI**

Taming the Scary Find/Change Dialog  
Super-Fast MIDI Pattern Auditions in SD 3  
Compressorless Dynamics Compression  
SONAR'S Real-Time Auto-Correction Features  
SONAR's Other Echo Plug-In  
A MIDI Footpedal for Your Processor  
Change Tempo with External MIDI Clock  
Create a MIDI Chord Track  
Convert PRV Controllers to Track View Automation

## **Chapter 7: Step Sequencing and Beats**

Piano Roll View/Step Sequencer Conversion and Synergy  
SONAR's Audio (Yes, Audio!) Step Sequencer  
The Paradox of Sophisticated Humanizing with Step Sequencers  
Fun with Beat Slices  
gLi tC H Vocals—the Easy Way  
Create “Faux” REX Files in SONAR  
The Real-Time Beat Machine

## **Chapter 8: Loops**

The Multitrack Loop Browser  
How to Keep Groove Clips “Groovy” When Processing Them  
Have Groove Clips Follow Pitch  
29 Things You Need to Know About Loops in SONAR  
Big Fun with “Loop Legos”  
How to Loop Pads without Gaps, Glitches, or Clicks  
Edit Your Way to (Much) Better Loops  
A Beautifully Deranged Timbre-Shifting Application

## **Chapter 9: AudioSnap**

High-Quality Warping and Beat-Matching  
Tweaking AudioSnap's Transient Map  
Audio Quantizing Made Easy with “AudioSnap à la Carte”  
Locking Bass to Drums

## **Chapter 10: Automation**

Get Even More Out of Mix Recall  
Add Dynamics and Feel with “Rhythmic Automation”  
Re-Discovering Snapshot Automation  
Fast Clip Automation Gain Edits

## **Chapter 11: Control Surfaces**

7 Steps to Cleaning Up Your “ACT” with Hardware  
Using the VS-700C and Avid Artist Series  
Remote Control and Viewing

## **Chapter 12: Tempo and Pitch-Shifting**

Les Paul’s Double-Speed Tape Trick  
Slow Down a Song so It’s Easier to Play Along  
Tempo Tricks  
Variable-Speed Background and Applications  
The “Fine-Tuning” Pitch Transposition Window  
How to Change the Tempo of an Entire Project

## **Chapter 13: Colorization**

How to Create More Vibrant Track and Console Colors  
Make Your Meters Look Really Cool  
Look at All the Pretty Colors!  
Meet the Theme Editor

## **Chapter 14: Windows**

SONAR Meets Bluetooth  
Potential Glitch Reduction/Latency Improvement  
Digital Audio Basics
